How To Bake Your TJ's Pizza

- **Bakes on the tray it is prepared on!**
- **Conventional Oven - 425, Convection - 400**
- Your pizza is best when allowed to come to room temperature prior to baking.
- Remove wrapper and instructions and place your pizza and the tray it's on, on **Middle oven rack for 12 - 18 minutes** or until **crust is golden brown** on top and bottom. Do not let tray touch the inner walls of your oven
- Check your pizzas progress after 8 minutes. You can pop any dough bubbles at this time.
- Remove pizza from oven & let sit for a couple of minutes. Slice, Serve, & Enjoy.

Additional Tips:

- If the pizza has been refrigerated, let it sit at room temperature for at least 1 hour before baking.
- **If you are going to bake your pizza within 1 hour** of pickup you do not need to refrigerate.
- Freezing your fresh TJ's is not recommended.
- For Best Results, Bake only one pizza at a time.
- **For a crispier crust**, gently slide pizza off tray and finish on the bare oven rack.
- **FOR 2 PIZZAS AT A TIME:** Set one rack above center and one below. Cooking time is longer and
